OBJECTIVE

I am looking for a position as a web developer, where I can apply the knowledge I have gained from college and training programs in a real work environment. I am eager to gain practical experience and further expand my skills by learning from the company's staff.

EDUCATION

UBT College

Computer science

2021 - Ongoing

During my time at UBT, I gained a deep understanding of computer science concepts and developed practical skills in programming, software development, and database management.

PROJECTS

- FSK WebSite

This website is about Kosova Army(Forca e Sigurise Kosoves).In this WebSite users can see the vehicles and weapons that FSK use, also you can fill the admission form to enter the Army.I make this Website using HTML/CSS for Front-end ,PHP for Back-end and SQL for Database

- Portfolio app

These applications allow users to create a professional online presence that highlights their skills, experience, and achievements.

- Menu Mate

MenuMate is a web application for restaurant system management, built using ReactJS for the front-end, Node.js for the back-end, and MySQL for the database. The web application provides functionalities for managing customer orders, user management, as well as table reservations for customers.

- Tech Wizz

Techwizz is a modern and innovative tech shop created with Django Python, aiming to provide an excellent shopping experience for its customers. The idea behind this project is to offer a wide selection of technological products on a user-friendly and attractive platform.
